PUBLIC NOTICE

Notice #06456-1
November 18, 2013

This notice is to inform the public that the S.C. Department of Health and Environmental Control (Agency) is taking public comments on a corrective action plan (CAP). Section 280.67 of the S.C. Underground Storage Tank Control Regulations (R.61-92) requires that any CAP prepared to meet the requirements of 280.66 be placed on notice for public comment. The CAP addresses the cleanup of soil and groundwater contamination at the facility listed below. The contamination was caused by petroleum products that were released from the former underground storage tank system at this facility.

FACILITY: Newberry County Maintenance Shop, 11494 SC-34, Newberry, SC

APPLICANT: Mid-Carolina Probe, LLC, 258 Tapp Road, Greer, SC 29651 on behalf of the County of Newberry, P.O. Box 156, Newberry, SC 29108.

SUMMARY OF CAP: Petroleum and petroleum byproducts naturally break down over time through chemical, physical, and biological processes. These processes are called natural attenuation. Mid-Carolina Probe has submitted a CAP proposing the use of the following technologies in addition to natural attenuation to clean up the contamination:

- Biostimulant injection: Injection of magnesium sulfate and/or activated carbon into the subsurface to enhance naturally occurring bacteria that metabolize petroleum chemicals of concern (CoCs) in groundwater.

PUBLIC COMMENT PERIOD DEADLINE: The deadline for submitting written comments is 5:00 PM, December 18, 2013. Any interested person(s) may submit written comments concerning the cleanup to the Project Manager listed below. Please bring this notice to the attention of persons whom you know will be interested in this matter. Where there is a significant degree of public interest, the Agency will hold a public hearing.
